

Congress of the United States
House of Representatives

July 12, 2025

The Honorable Pam Bondi
Attorney General of the United States
U.S. Department of Justice
950 Pennsylvania Avenue, NW
Washington, D.C. 20530

Dear Attorney General Bondi,

I am writing to urge the Department of Justice to immediately drop all charges against Dr. Michael Kirk Moore, who is currently facing 35 years in federal prison for protecting patients from the COVID-19 vaccine.¹ Dr. Moore is a hero for refusing to inject an experimental vaccine into the arms of patients who did not wish to subject themselves or their children to a human experiment.

Dr. Moore is a decorated U.S. Navy Flight Surgeon with no criminal record. In the wake of the COVID-19 pandemic, he shifted his focus to serving the patients in his community. He courageously protected medical freedom by issuing vaccination record cards without administering the dangerous vaccines, allowing individuals and families in his community to live without fear of being demonized by society for being unvaccinated. Furthermore, he bravely destroyed thousands of vials of the COVID-19 vaccine and, at the request of some parents, injected saline into children whose parents wanted them to believe they got vaccinated without risking the deadly side effects. Dr. Moore has served this country in more ways than one, and he is a hero, not a criminal. He refused to succumb to the pressure of the mainstream narrative, the lies of the pharmaceutical industry, the so-called “science”, and the tyrannical mandates of the federal and state governments, and now, he is facing what could be the rest of his life in federal prison for doing so.

The charges brought initially by the corrupt Biden Justice Department against Dr. Moore are a blatant attempt to punish dissent and silence those who question the safety of experimental vaccines. Under Joe Biden’s Department of Justice, Democrats weaponized the agency against pro-lifers, J6ers, Catholics, parents at school board meetings, and doctors who protected patients. Dr. Moore exhibited resilience and courage by adhering to true medical research that exposed the dangers of the mRNA COVID-19 vaccine.

Historically, a vaccine is subjected to an average of 10-12 years of clinical trials before it is authorized for administration to the general population. Yet, under an Emergency Use Authorization (EUA), these vaccines were available to the public as early as 10 months after development. Furthermore, the COVID-19 vaccines were immediately authorized for use in pregnant women, which was unprecedented in the history of medicine.² The Vaccine Adverse Event Reporting System (VAERS) is a U.S. government system managed by the Centers for Disease Control and Prevention and the Food and Drug Administration used to track adverse reactions to vaccines since 1990. Since the rollout of the COVID-19 vaccine, there have been over one million adverse events reported in the U.S., including miscarriages, myocarditis, heart attacks, permanent disability, and death.³ The COVID-19 vaccine has injured and killed over a million people without a single charge brought against a vaccine manufacturer because they are protected under federal law. Meanwhile, a brave doctor who refused to inject it into his patients and issued vaccination record cards is facing 35 years in federal prison. He harmed no one and is innocent of wrongdoing.

Dr. Michael Kirk Moore deserves to be celebrated, not prosecuted, for his bravery in standing up to a system that prioritized control over public health.

I urge your Department of Justice to immediately drop all charges against Dr. Moore and co-defendants Kari Dee Burgoyne, Kristin Jackson Andersen, and Sandra Flores.

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in blue ink that reads "Marjorie Taylor Greene". The signature is written in a cursive, flowing style.

Marjorie Taylor Greene
Member of Congress
